

Associate in Applied Science-Transfer Nursing Outcomes

Students will demonstrate outcomes in each of the following areas:

Nursing

After successfully completing the Nursing requirements, students will:

1. Demonstrate caring by treating all people with dignity and respect.
2. Communicate relevant, accurate, and complete information in a concise and clear manner both orally and in writing.
3. Provide nursing care through orderly collection of information from multiple sources to establish a nursing database from which a plan of care may be developed.
4. Use theoretical knowledge, analysis of assessment data, and critical thinking in developing a comprehensive plan of care and in management decisions that ensure safe, effective care.
5. Use concepts of teaching/learning to develop multiple teaching approaches to assist clients to change behaviors to promote health.
6. Coordinate the decision making process with the client, significant support person(s), and other members of the healthcare team.
7. Adhere to standards of professional practice within ethical, legal, and regulatory frameworks.
8. Demonstrate accountability for personal actions, behaviors, and continuing competence in the discipline.

Communication

After successfully completing the written communication requirement, students will:

1. Demonstrate literal and inferential comprehension.
2. Communicate clearly and effectively in appropriate contexts.

Quantitative/Symbolic Reasoning

After successfully completing the quantitative skills requirement, students will:

1. Apply algebraic, analytic, geometric or statistical reasoning to solve abstract and applied problems appropriate to an individual discipline
2. Interpret mathematical, quantitative or symbolic models such as formulas, graphs and tables, and draw inferences from them
3. Employ basic symbolic or quantitative reasoning to support a position or conclusion

Health/PE Outcomes

After successfully completing the PE requirement, students will:

1. Understand and articulate the various elements of fitness (e.g., cardiovascular endurance, strength, flexibility, body composition).
2. Understand, articulate, and evaluate how various factors (e.g., genetics, diet, activity) promote health and wellness.

3. Understand and practice safe workout practices.
4. Identify, understand, evaluate, and apply appropriate fitness strategies (e.g., diet, exercise).

Choice of Ten Credits from Transfer Distribution Areas may result in any combination of the following outcomes:

Humanities

After successfully completing the humanities distribution requirement, students will:

1. Demonstrate literal and inferential comprehension.
2. Communicate clearly and effectively in appropriate contexts.
3. Understand and interpret human achievements in various forms.
4. Analyze and synthesize meaning in verbal, visual and/or auditory media.

Social Science

After successfully completing the social science distribution requirement, students will:

1. Understand, articulate, and evaluate the similarities and differences between and among various social sciences.
2. Understand, articulate, and evaluate how various factors (e.g., social, personal/individual, historical, political, and economic) influence human behavior.
3. Understand, articulate, and evaluate the applicability of significant theoretical perspectives (e.g., conflict theory, feminist theory, cognitive behavioral theory) as they relate to contemporary social issues.
4. Identify, understand, evaluate, and apply research literature from multiple social science disciplines.

Science

After successfully completing the science distribution requirement, students will:

1. Understand the nature of science, including the role of observation in the development of scientific theories and laws;
2. Use the languages of science to interpret and communicate scientific information;
3. Use scientific knowledge to analyze and evaluate data and solve problems; and
4. Obtain and analyze experimental data.
