

## Automotive Technology Program Outcomes

After successfully completing the Automotive Program requirements, students will:

1. Accomplish automotive repairs in all 8 areas of the automobile required by the ASE Standards.
2. Utilize the proper basic shop equipment and tools needed to adequately complete repairs.
3. Show exemplary behaviors while at work, following the protocol of a professional technician.
4. Select the proper data from shop manuals and computer resources as required to complete repairs.
5. Diagnose symptoms by combining and applying knowledge from multiple sources e.g. other technicians, IATN (information bank), the internet, passed experience, etc.
6. Recognize, and avoid or resolve potentially hazardous situations related to automotive repair.
7. Describe and write findings, repairs, parts, updates, modifications, and labor time on repair orders clearly and effectively to employer satisfaction.
8. Present ideas and information in writing or verbally in a comprehensive manner to co-workers, employers, and customers.
