NATIVE CASES CONFERENCE SCHEDULED FOR APRIL

The 2023 Enduring Legacies Native Cases Conference on the 25th and 26th of April in Spokane will build on more than eighteen years of work developing interdisciplinary teaching of case studies on significant issues in Indian Country and offering workshops for staff development and for educators to network and learn how to use the cases in their classes. The interdisciplinary collection of cases covers a wide range of topics applicable to all academic fields. Problem-based learning, place-based learning, and collaborative learning are the cornerstones of the approach. Cases promote student engagement and critical thinking in the context of complex and pressing real world issues. They are a terrific way of promoting diversity. At this institute, attendants will practice working through cases collaboratively to learn how to facilitate case analysis and discussion. The 2023 conference will feature new cases on the cutting edge of current issues in Indian Country with a special emphasis on education reform and climate change.
