

# APPLICATION FOR MEDICAL RESERVE PARKING PRIVILEGES

## PLEASE READ BEFORE COMPLETEING THIS FORM

The location of Grays Harbor College is very special; however, it is on a hill. This creates some drawbacks in terms of accessibility. In an effort to deal with this, we have reserved a portion of our student parking lot for students who would suffer a medical threat if they were subject to climbing the steps from our lower parking lots.

The hill, which has been affectionally named "Cardiac Lane," is somewhat of a climb. It is composed of 78 steps and several walkways; the majority are covered and have hand rails. For most students, cardiac lane is an inconvenience; however, for others it is a major concern due to physical limitations. If this is the case, Medical Reserve parking may be an option. Please be aware of the following:

- **A person who has Medical Reserve parking privileges is not guaranteed a parking spot. Medical Reserve parking is limited to availability.**
- **A Medical Reserve permit does not allow the holder to use parking reserved for persons who have state issues disabled parking permits.**

We respectfully ask that all applicants use Medical Reserve parking as a last resort. The demand for this parking is always much higher than the amount of parking that is available.

Sincerely,

Accessibility Services
