

# Math Resources

---

## Your Instructor

Your instructor is willing to help! Drop by his or her office during office hours; make an appointment, call, or email. Instructors are there to help students; just ask.

## Learning Center Tutors

If the Learning Center is open, there is a tutor who can help with basic math (ABE and math 60) through intermediate algebra (math 98). Very often there is a tutor to help with higher levels of math too. Check the schedule on our website for specifics [www.ghc.edu/t3/schedule.htm](http://www.ghc.edu/t3/schedule.htm). You don't have to make an appointment to see a tutor, just drop in and ask for help. The Learning Center is located on the first floor of the library building (1519).

## Your Classmates

Form a study group with classmates. Working together can increase your understanding of the material. During the first week of class, exchange contact information with a classmate so you have a partner to rely on.

## Interact Math

Students in math 70, 95, and 98 have free access to the Interact Math website through their textbook. [www.interactmath.com](http://www.interactmath.com) You can get help with homework problems, work extra problems, take practice tests, and ask for hints along the way.

## ModuMath

ModuMath is a collection of digital video lessons that cover math topics from basic math (math 60) through intermediate algebra (math 98). There are tests for each topic that you can take before or after you complete the lesson. ModuMath is available on the computers in the Learning Center (1519) and Whiteside, Raymond, and Ilwaco sites. ModuMath lessons (but not tests) are also available online:

Please contact the Learning Center Coordinator, Laura Ratcliff, at [lratclif@ghc.edu](mailto:lratclif@ghc.edu) or 360-538-4060 for a password.

## eTutoring

GHC is a member of the Northwest eTutoring Consortium. You may work with a math tutor online through either email or chat (scheduled hours). Go to <http://www.etutoring.org>, and log in to the Northwest eTutoring Consortium, choose Grays Harbor College, and use your SID to log in.

## Intelligent Tutor

Intelligent Tutor CDs contain lessons and practice for pre-algebra, algebra, geometry, trigonometry, introductory calculus, business math, and SAT math to load on your personal computer. Free CD's are available from the Learning Center Coordinator. Stop in 1516 or call 360-538-4060.

## Learning Links

The staff of the GHC Learning Center has compiled a list of helpful math websites covering all levels of math. We found these sites to be easy to use, relevant to GHC students, and free. See our list at [www.ghc.edu/t3/learninglinks.htm](http://www.ghc.edu/t3/learninglinks.htm).

## GraspMath DVD's

DVD's are available for check-out from GHC Library [www.ghc.edu/library/home](http://www.ghc.edu/library/home). Each set has multiple DVDs to break the topics up into small pieces. DVD's are available for basic math (math 60) through intermediate algebra (math 98). Take the DVD's home to watch or use a DVD player in the Library or Learning Center.

## SAS Pathways

More than 1,200 online, interactive lessons in all core disciplines: Math, English, Science, Social Studies/History and Spanish, are available to you at no cost from CT Distance Learning Consortium via [SAS Curriculum Pathways](#). Log in using User Name: [opposite9since](#)

## Old Edition Textbooks

You may borrow out of use textbooks from the GHC Learning Center. We have textbooks at all levels and are glad to lend them out. Stop in and ask the Learning Center staff. First floor of the library building (1519).

## You-Tube

Go to [www.youtube.com](http://www.youtube.com) and search for a topic you want help with. You'll be amazed at how many math professors have posted videos of themselves teaching math topics. Not sure what search words to use? Try the name of the section or chapter you are working on.

## Internet Search

Try putting the topic you are trying to learn about into a search engine such as Google [www.google.com](http://www.google.com). There are many sites that were designed to help students with math. Not sure what search words to use? Try the name of the section or chapter you are working on.

## Student Solutions Manual

Many math texts have a Student Solutions Manual available. The solutions manual shows odd numbered problems worked out step-by-step. If it is available for your text, you may find a solutions manual for purchase in the GHC bookstore. Solutions manuals are also available for use in the GHC Learning Center (1519).
